

Carbon Reduction Plan (CRP) PPN06/21

Supplier Name Desk Top Publishing Micro Systems t/a DTP Group

Publication Date February 2026.

Our commitment to achieving Net Zero

DTP Group is committed to achieving Net Zero emissions by 2040 and Carbon Neutrality by 2035.

We recognise that our current rate of emissions reduction exceeds our original trajectory. As a result, we are strengthening our targets and accelerating our decarbonisation strategy across all emission scopes.

Our approach prioritises absolute emissions reduction, with offsetting used only for residual emissions that cannot be eliminated.

Baseline Emissions Footprint

DTP has been doing great work in support of its environmental stewardship. We started collecting data in accordance with Streamlined Energy and Carbon Reporting (SECR) requirement for all activity from January 2021 to the end of December 2025.

We prioritise primary data collection across Scope 1, 2, and 3 emissions to improve accuracy and reduce reliance on industry averages.

The following table outlines DTP's baseline figures for DTP's CRP 2021:

Baseline Year Emissions 1 st January 2021 to 31 st December 2021	
EMMSIONS	TOTAL (tCO2e)
Scope 1	84.6
Scope 2	15.1
Scope 3	71.5
Total Emissions	171.2

The following table outlines DTP's Current figures for DTP's CRP 2025:

Baseline Year Emissions 1 st January 2025 to 31 st December 2025	
EMMSIONS	TOTAL (tCO2e)
Scope 1	59.8
Scope 2	1.6
Scope 3	55.5
Total Emissions	116.9

Carbon Reduction Targets

Short-Term Targets (2026)

- Scope 1: 54.3 tCO₂e
- Scope 2: 1.5 tCO₂e
- Scope 3: 53.0 tCO₂e

This equates to a further ~8–10% reduction year-on-year.

Medium-Term Targets (2030)

To reflect our accelerated progress, DTP has adopted enhanced targets:

- 50% reduction in total emissions by 2030 (vs 2021 baseline)
- 80% reduction in Scope 1 & 2 emissions by 2030
- 30–40% reduction in Scope 3 emissions by 2030

Long-Term Targets

- Carbon Neutral: 2035
- Net Zero: 2040

Review of 2025 Performance

DTP has achieved a 38% reduction in emissions over four years, significantly exceeding the original target of 19% reduction by 2025.

This overperformance reflects:

- Transition to low-carbon energy sources.
- Improved operational efficiency.
- Expansion of circular economy services.

We will continue to strengthen targets and implement new technologies to maintain this trajectory.

Carbon Reduction: Projected vs. Actual

Carbon Reduction Projects for 2025

1. Scope 1 Emissions

- Deliver a minimum 5% annual reduction in Scope 1 emissions.
- Conduct a fleet and heating electrification feasibility study by 2027.
- Transition toward ultra-low emission or electric vehicles, targeting 50% fleet conversion by 2030.

2. Scope 2 Emissions

- Achieve 100% renewable electricity by 2026, supported by certified renewable energy supply.
- Maintain low Scope 2 emissions through energy efficiency improvements.

4. Scope 3 Emissions Reduction

Purchased Goods & Services

- By 2027, 70% of key suppliers (by spend) will report emissions data.
- By 2030, 50% of suppliers will have Net Zero or equivalent targets.

Business Travel

- Reduce emissions per employee by 15% by 2028.
- Implement rail-first policy for UK travel where practical.

Employee Commuting

- Reduce commuting emissions by 15% by 2028.
- Support EV adoption through on-site charging infrastructure.
- Promote hybrid and flexible working.

Capital Goods & IT Equipment

- Extend IT asset lifecycle by 30%
- Ensure 90% of retired equipment is reused, refurbished, or recycled.

5. Circular Economy & Upcycling Leadership

DTP will expand its IT reuse and refurbishment programme:

- Process 10,000+ devices annually.
- Increase customer participation year-on-year.
- Deliver measurable carbon avoidance.

Target:

- Avoid 500 tCO₂e annually by 2030 through reuse and refurbishment.
- Enhance reporting of customer carbon savings.

Governance and Accountability

To ensure delivery of this plan:

- A designated Sustainability Lead will oversee performance.
- Emissions will be monitored quarterly
- Progress will be reviewed annually at senior management level
- Carbon performance will be integrated into business decision-making

DTP will continue to align the principles of the ISO 14001 Environmental Management Systems standard and will review operations against the standard to identify any compliance gaps. We will continue to work with our own and our clients' procurement functions to embed environmental sustainability in procurement processes. This will ensure that our own suppliers are able to demonstrate their commitment to achieving Net Zero by 2050, and to help our clients on their own Net Zero journeys.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emissions conversion factors for greenhouse gas and company reporting.

<https://ghgprotocol.org/corporate-standard>

<https://www.gov.uk/government/collections/government-conversion-factors-for-company-reporting>

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

<https://ghgprotocol.org/standards/scope-3-standard>

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

A handwritten signature in black ink, appearing to read 'Howard Hall', with a long horizontal flourish underneath.
